listen) means that you tend to focus on the surface structure, rather than on the underlying structure of the problem. For example, in one experiment, 4 subjects saw a problem like this one:

Critical Thinking - AFT

The critical period hypothesis is the subject of a long-standing debate in linguistics and language acquisition

over the extent to which the ability to acquire language is biologically linked to age. The hypothesis claims that there is an ideal time window to acquire language in a linguistically rich environment, after which further language acquisition becomes much more difficult and effortful.
