

### **deep green living pdf**

Green is the color between blue and yellow on the visible spectrum. It is evoked by light which has a dominant wavelength of roughly 495–570 nm. In subtractive color systems, used in painting and color printing, it is created by a combination of yellow and blue, or yellow and cyan; in the RGB color model, used on television and computer screens, it is one of the additive primary colors, along ...

Sustainable living is fundamentally the application of sustainability to lifestyle choice and decisions. One conception of sustainable living expresses what it means in triple-bottom-line terms as meeting present ecological, societal, and economical needs without compromising these factors for future generations.

Anything that was once living can be hot composted – and I really do mean anything. All manner of things, including strange additions such as wool and cotton clothing, bones, leather boots, even things like – roadkill –, i.e. dead animals, but these have to go in the very centre of the heap to break down properly.
