Data Science for Tackling the Challenges of Big Data

A recurrent neural network (RNN) is a class of artificial neural network where connections between nodes form a directed graph along a sequence. This allows it to exhibit temporal dynamic behavior for a time sequence. Unlike feedforward neural networks, RNNs can use their internal state (memory) to process sequences of inputs. This makes them applicable to tasks such as unsegmented, connected ...

3.1. Static three-dimensional culture3.1.1. Spheroids. One of the simplest methods of 3-D culture was achieved by formation of multicellular aggregates, or spheroids, which allow 3-D interactions with cells and the ECM in the absence of additional substrates .These spheroids have been utilized with a wide range of adherent cell types, formed by forced or spontaneous aggregation techniques ...

Integrating internal and external customer relationships through relationship management: A strategic response to a changing global environment

Integrating internal and external customer relationships

Abstract. This article describes the importance of controlling the moisture content of wounds and areas of vulnerable tissue, with particular emphasis on the use of dressings that provide protection to periwound skin, which may be damaged by proteolytic enzymes present in exudate from chronic wounds.

The role of dressings in the treatment of moisture-related
